

HÄGGLUNDS BV206 ROLL OVER PROTECTION

TECHNICAL AND PRODUCTION FEATURES

- Full external ROPS assembly to suit Hägglunds BV206 front and rear people carrying modules.
- Design meets the requirements of ISO 8082-1:2009 ROPS standard "Self-propelled machinery for forestry".
- Configurable front section to suit both short and long nose applications.
- Designed to allow clearance for all doors, windows and roof hatches to operate normally.
- Finished in durable black polyester powder coat, enhanced with a zinc primer beneath.
- Designed as a fully sealed product to prevent any water ingress in marine applications.
- Full bolt on solution, only drilling required.

With over 50 years of combined experience in high mobility vehicles, our expertise positions Envirotrax as a premier provider of both new and used equipment across various applications.
